

## GEAR INSPECTION and AUDIT REPORT

**CLUB / SERVICE:**

---

DATE OF GEAR INSPECTION:

---

DATE OF AUDIT:

---

DATE INSPECTION APPROVED:

---

\_\_\_\_\_  
Supervising Officer

\_\_\_\_\_  
Other appropriate officer

- Original to LSV (Regional Officer to return within seven days of completion)
- Duplicates to Club

**NOTE:**

- Refer to individual SLSA and LSV policies and specifications for further information - [www.slsa.com.au](http://www.slsa.com.au). Or [www.lifesavingvictoria.com.au](http://www.lifesavingvictoria.com.au)
- These inspection requirements are for patrol gear inspections only (safety and operational inspections). The items may be required to meeting further competition scrutineering requirements for surf sports purposes.
- Surf Life Saving Gear Inspections do not replace an authorised RTA inspection or registration or any other State or National regulatory requirements.

## General Gear Inspection / Audit Guidelines

Please have ready for your Gear Inspection / Audit the items (as appropriate) listed herein.

At least **FOUR** capable and able Club officials / members must be in attendance for the Gear Audit.

To assist the Inspection Panel, Clubs are asked to have ready the following:

- Kit items (e.g. first aid, airbag resuscitator) are spread out for inspection in an orderly manner.
- Patrol tent, enclosures and patrol screens are available as per State requirements.
- Rescue boards and tubes are laid out and not on racks.
- Serial numbers and equipment are already listed in surfguard.

Please note:

- Motors will have to be run and tested.
- Soft-hull IRB's to be inflated, with floorboards out.
- Radios will have to be turned on and tested
- All quad bikes, ATV's, RWC's, beach signage and flags are to be presented and available as per Branch and/or State requirements.
- Most items should be numbered – refer to state requirements.
- The contents of kit items (e.g. first aid kits, shark bags) are state specific. Refer to attached documentation for confirmation of the makeup of these kits and appropriate documentation.

Thank you for your anticipated cooperation and work in this area.

## Grading of Gear

All items will be graded and if passed, approval stickers will be issued.

<b>P = PASS</b>	Ok to use on Patrol & Club activities
<b>F = FAIR</b>	Item may require maintenance or attention before use
<b>R = RE-INSPECT</b>	Item needs major repair <b>or</b> was not ready for inspection
<b>D = DISCARD</b>	Item is beyond repair – discard and <b><u>NEVER USE AGAIN</u></b>

### *LSV General Instructions*

All gear presented for inspection must be in good, safe working order. It should be free from any faults, which may cause lifesavers, bystanders or patients any unnecessary risk or injury. It should also appear in a condition to project an efficient image of the Club and of Life Saving Victoria to the public.

It is the responsibility of the Club and respective office bearers to see that all gear is in a serviceable condition and passed the clubs internal gear inspection prior to the official audit. As a guide to that standard they should take note of the instructions listed throughout and contained in this Gear Inspection Manual and any relevant circulars issued from time to time

**Note:** that where a section is required for patrol, it is headed with "(Minimum Requirements)".

**Any gear rejected at the inspection is to be dismantled, if applicable, and clearly marked OUT OF SERVICE, with an designated Out of Service tag as indicated below. Gear and equipment which has been rejected/not presented is not to be used for patrolling duties, training purposes for instruction and assessment or for competition of any nature. No insurance cover is provided when using such equipment.**

The unserviceable gear must be clearly identified and tagged by the Regional Officer or Inspector, eg sponsor's name, colours, serial numbers, etc.

Standard Life Saving Victoria (LSV) 'Out of Service' Stickers will be used for identifying gear and equipment that is below standard.

**Only the person marking and placing the OUT OF SERVICE tag may authorize its removal.**

The Regional Officer or Chief Inspector is to ensure completion of this report, with remarks in the spaces provided and initial each page.

The Club will be given a signed copy of this report to be produced on request by the relevant Regional Officer/Patrol Inspectors

The Chief Inspector is to ensure that the names of all Inspectors assisting with the Inspection are recorded on the normal assessor attendance sheet and submitted to the State Centre.

**It is the clubs responsibility to ensure that any unserviceable equipment that is proposed to be used is repaired and the "out of service" tag may only then be removed when authorized by the person who originally marked it.**
