Circulars are available at www.lifesavingvictoria.com.au/circulars

The Community Facility Funding Program helps provide high quality, accessible community sport and recreation facilities across Victoria. The program encourages better planning of sport and recreation facilities, innovative sport and recreation facilities, increased community access to leisure opportunities, inclusion of environmentally sustainable design elements, AND strengthening communities through increasing sport and recreation participation.

There are two categories of funding available in this program, Planning and Building Community Infrastructure.

The link below will provide you with further information and guidelines for the 2010/2011 round of the Community Facility Funding Program.

I would like to reinforce that partnerships/consultation with SSAs is supported and promoted in the application for this funding, and encourage your organisation to consider getting involved.

N.B. The guidelines state that it is highly recommended that council's make timely contact with peak bodies, local leagues/associations to seek their support and input into project proposals. Letters of support from SSAs and supporting organisations should clearly indicate how they will either support the project or benefit from the scope of works i.e. aligns with SSA strategic planning.
